

Free Flow™

DRAIN/SEPTIC/GREASE TRAP

The next step in technology for the biological treatment of drain lines, grease traps, and septic tanks

FEATURES

- **Made in the USA**
- **Free Flow contains a blend of microbial species that, when put together, degrade grease, long and short chain fatty acids, proteins, lipids, carbohydrates, and organic waste**
- **Free Flow works in low pH environments, specifically degrading long and short chain fatty acids**
- **Ready to use formula**
- **Environmentally friendly**

BENEFITS

- **Creates jobs**
- **Does not transfer grease downstream. The microbial colony actually degrades and digests grease and scum from drain lines and traps**
- **Controls odors by degrading malodorous volatile fatty acids present in septic or anaerobic environments (grease traps and drain lines)**
- **Reduces the frequency of grease trap clean out**
- **Can eliminate drain line clogs due to grease**
- **Alleviates low pH problems**
- **Safe to use; won't damage pipes and traps**
- **Easy to use; can be applied manually or by using an automatic dosing system**
